

Alkaline Battery [MB1035AA & MB1035AAA] User Manual

1. Don't store batteries in the refrigerator or freezer. Batteries are best kept in a dry place at normal room temperature. Prolonged exposure to extreme heat or cold can reduce battery life and/or quality. Allowing cold batteries to slowly warm up to normal room temperature (10C-25C) should restore normal operation.

2. Be prepared with spare batteries for important occasions. Do you really want to miss a once-in-a-lifetime photo opportunity because you don't have spare batteries for your camera? Buy batteries with the longest freshness date available, and use those on hand with the closest freshness date first.

3. Replace all your device's batteries at the same time. Mixing old and new batteries, or batteries of different types or brands, in a device can lead to battery leakage and device damage.

4. Be sure to align your battery's positive (+) and negative (-) terminals correctly when inserting them into a device. Some devices may appear to work properly if one battery is inserted incorrectly, but this can lead to battery leakage or rupture.

5. Remove batteries from a device when it is not expected to be in use for several months. Batteries should also be removed from equipment while it is being powered by household (AC) current.

6. Always replace the battery or batteries in your equipment with the size and type of battery specified by the equipment manufacturer. Using the wrong type or size could cause malfunction or equipment damage.

7. Do not store batteries loosely or carry them loose in your pocket or purse. They can be shorted by contact with metal objects and leak or rupture.

8. Primary batteries should be discarded with your regular household trash. Never dispose of batteries in fire.

9. Never attempt to recharge a battery unless the battery specifically is marked "rechargeable."

10. Keep battery contact surfaces and battery compartment contacts clean by rubbing them with a clean pencil eraser or a clean cloth each time you replace batteries.
